TECHNICAL SKILLS

Proficient: ReactJS, NodeJS, ExpressJS, MongoDB, CSS3, HTML5, JavaScript, jQuery, Git, JWT
Familiar**:** Redux, Typescript, MySQL, SASS

PROJECTS

Color Theme Visualizer   www.theme-visualizer.netlify.app
- Color theme visualizer built using React and Redux for fellow developers
- Users can easily visualize and experiment with default color themes or add their own
- Enables developers to save time and effort in selecting and testing color themes for their projects

Nutrition app - Healthy Living   www.healthy-living2.netlify.app
- Nutrition app that enables users to calculate their daily calorie intake based on body dimensions such as height, weight, age, and gender. Built using ReactJS, ExpressJS, and MongoDB
- Users can track their calories and food intake with a user friendly food diary feature
- Utilizes JSON Web Token for authentication to ensure a safe and reliable platform

2D Game - Cat Fishing   www.alyssasitto.github.io/cat-fishing-game
- 2d Game built using HTML5, CSS3, and JavaScript
- Functionality of the game was made possible with the use of canvas, allowing for the creation of a dynamic and visually appealing gaming experience
- Implements winning and losing logic and keeps track of high score

Spotify Clone   www.alyssasitto.github.io/cat-fishing-game
- Built using Spotifys REST API and Web Playback SDK
- Implements authorization and authentication through OAuth2.0 to ensure secure user access
- Project provides a seamless user experience that looks and feels very similar to the Spotify application

WORK EXPERIENCE
